### Description:

The TL-WA601G is a 108M wireless access point compliant with 802.11b and 802.11g standards. It provides the access from the wireless station to wired LAN and vice versa; It can also be used to extend the wireless range. If you find the signal of your wireless router is not strong enough to cover your entire house or office, you can use the TL-WA601G as a repeater to repeat the wireless signal from your wireless router to the AP's location; To build a wireless connection between two buildings, you can use two of this access points to work as a bridge. With so many different functions such as AP, AP Client, AP + Bridge, Bridge, and Universal / WDS Repeater, the TL-WA601G is ideal for a diverse number of complex network environments.
